

Leonardo Malannino

Full-Stack Developer

leonardo.malannino@gmail.com
Friuli-Venezia-Giulia, Italy - Driving license: Category B

PROFESSIONAL SUMMARY

Full-stack developer building web applications with TypeScript, React, Next.js, and Node.js. I handle end-to-end implementation from database modeling in PostgreSQL and Supabase to responsive, accessible frontends with Tailwind CSS. My workflow integrates agentic AI tools directly inside the IDE to accelerate prototyping, test coverage, and feature delivery.

SKILLS

Communication skills:	Good communication and teamwork skills developed through years of school, freelance client relations, and collaborative online projects.
Tools & Deployment:	GitHub - Git - VS Code - Antigravity - Claude Code - GitHub Copilot - XAMPP - Vercel - Netlify
Frontend:	HTML - CSS - JavaScript - React - Next.js - TypeScript - Tailwind CSS
Backend & Databases:	PHP - MySQL - PostgreSQL - Node.js - Supabase - Prisma - Apache
Animations & 3D:	Python - PyOpenGL - PyGame - Spline

EXPERIENCE

Freelance Full-Stack Developer

SEP 2025 - PRESENT

Hyrise Studios (Freelancer studio)

Friuli-Venezia-Giulia, Italy

Development and maintenance of modern web applications with a focus on end-user experience and graphic design. Deeply integrated artificial intelligence into the workflow, utilizing advanced AI agents directly within the IDE to maximize efficiency and code quality.

- Custom high-performance web applications using Next.js, React, TypeScript, and modern styling solutions.
- Integration of AI coding assistants within the IDE environment to accelerate feature delivery.
- Refined collaborative and client communication skills, translating complex project requirements into scalable, clean, and intuitive user interfaces.
- Integration of backend APIs and databases using Supabase, Node.js, and PostgreSQL for real-time interactivity.

IT Support & Networking Intern

JUL 2024 - AUG 2024

u-blox S.p.A. (Corporate IoT & Wireless Semiconductor Leader)

Sgonico (TS), Italy

School internship focused on networking and IT support, getting hands-on experience in a corporate environment. I assisted in configuring network devices and maintaining network infrastructure.

- Hands-on experience in a high-tech corporate environment assisting the IT infrastructure team.
- Enterprise network hardware devices configuration and network infrastructure monitoring.
- Hardware, software, and connectivity troubleshooting for on-site corporate employees.
- Practical understanding of cybersecurity measures, access controls, and network protocol topologies.

Student Developer & Project Collaborator
SEP 2021 - PRESENT

I.S.I.S. "Brignoli-Einaudi-Marconi" (Technical Institute) Staranzano (GO), Italy

Development of responsive and optimized user interfaces for web applications. Collaboration with design teams to implement high-quality UI/UX.

- Full-featured web applications incorporating front-to-back database connectivity, authentication, and responsive design.
- Team projects to design, prototype, and implement academic software solutions.
- Foundational programming concepts in C++, Python, PHP, and modern JavaScript/TypeScript.

EDUCATION

Bachelor's Degree - Computer Science
SEP 2026 - PRESENT

University of Udine Udine (UD), Italy

I am currently pursuing a Bachelor's Degree in Computer Science at the University of Udine, where I am expanding my theoretical knowledge and practical skills in software development, algorithms, data structures, and emerging technologies.

- Currently pursuing a Bachelor's degree program focused on computer science fundamentals, including programming, data structures, and algorithms.
- Actively developing problem-solving and critical-thinking skills while building a strong foundation in software engineering principles.
- Exploring logic, math, and advanced computer science concepts to develop innovative solutions.

Technical Diploma - Information Technology and Telecommunications
SEP 2021 - JUN 2026

I.T.T. Guglielmo Marconi Staranzano (GO), Italy

Through my studies, I have gained experience in building secure, responsive web applications and collaborating effectively within team-based projects.

- Hands-on coursework in secure web application development, database management systems (SQL), and object-oriented programming.
- Network design, switching & routing protocols, network security, and telecommunications theory.
- Emphasis on collaborative group projects, code reviews, and practical lab assignments.

CERTIFICATIONS

English B2 - Cambridge First Certificate *(CEFR B2 Upper-Intermediate)*

Demonstrates the linguistic competence to communicate fluently and effectively in professional and international technical settings.

Cisco ITE - IT Essentials *(Foundational)*

Entry-level certificate that validates the ability to build, secure, and troubleshoot computer hardware, software, and basic networks.

Cisco CCNA - Introduction to Networks *(Intermediate)*

Intermediate-level certification that validates the ability to install, configure, and manage advanced switched and routed networks using industry-standard protocols.

ICDL - Full Standard *(International Standard)*

A comprehensive, internationally recognized certification that proves the mastery of essential digital skills, ranging from office productivity applications to online security and collaboration.

I authorize the processing of my personal data pursuant to D. Lgs. 196/2003 and GDPR (EU 2016/679).
